WebOPAC : Advanced Search

Advanced search is a structured search by using Boolean operators (and, or, not). The Search boxes allow you to search by Keyword, Title, Author, etc. And to combine these searches to narrow your results.

Boolean operators are logical search operators that allow you to narrow or broaden search. They are used in searching a wide range of electronic resources including :

- Library catalog (WebOPAC)
- Bibliographic databases
- Most Internet search engines

The screenshot shows the 'Advanced search' page of the Malaysian Rubber Board website. At the top left is the logo of the Malaysian Rubber Board. The main heading is 'Malaysian Rubber Board'. Below the heading are navigation links: 'Advanced search | Authority search | Tag cloud'. The search interface includes a breadcrumb 'Home > Advanced search' and a 'Search for:' section. This section contains three search criteria: 1. 'Author' with a dropdown arrow and a text box containing 'Sekhar'. 2. 'and' with a dropdown arrow and a text box containing 'Title phrase'. 3. 'and' with a dropdown arrow and a text box containing 'rubber'. Each text box has a '+' and '-' icon to its right. Below the search criteria are three buttons: 'Search' (green), 'Fewer options', and 'New search'. Numbered callouts (1-6) are overlaid on the image, pointing to specific elements: 1 points to the 'Author' dropdown, 2 points to the 'Sekhar' text box, 3 points to the 'and' dropdown between the first and second criteria, 4 points to the 'Title phrase' dropdown, 5 points to the 'rubber' text box, and 6 points to the 'Search' button.
